

FACTSHEET (R MUR)

31 May 2022

Investment Focus

AXIOM Sustainability Premia aims to participate in rising markets, benefitting from long-term appreciation of ESG related equities and outperform in falling markets by providing downside protection against highly volatile markets.

By investing in a long-short strategy, the Fund seeks to be market neutral with low correlation to traditional asset classes. The layer of protection also allows the strategy to limit volatility.

The European market, which is considered the most mature sustainable universe is the ideal vehicle to implement our strategy.

Market Review

Over the month, the European ESG Stocks as measured by the EURO STOXX 50 ESG Index TR (EUR) was up by 2.41% outperforming the EURO STOXX 50 Index TR (EUR) by 31bps. Top performing countries in the ESG space were Germany and Spain while top performing sectors were Energy and Financials sectors. Market sentiment on European ESG stocks has been strong across the board, our indicator based on investor flows reveals a net inflows of approx. EUR358M last month on the asset class. At the end of last month and since the last expiry, 62% of AXIOM Sustainability Premia investment has been profitable. At the country level, top contributors were Netherlands and Switzerland while main detractors were Sweden and Belgium. At the sector level, Materials and Financials contributed positively to the overall performance while Communication Services and Utilities contributed negatively. Top performing underlying stocks such as Koninklijke DSM NV a Dutch-based multinational life sciences company specialised in nutritional products and performance materials helped the fund performance while SSE Plc an energy distributor which has the largest renewable portfolio in the UK and Ireland declined during the month and was one of the main detractor.
